Christmas project  
School year 2021-2022

# Make a wish aim

- Make a wish creates life-changing wishes for children with critical illnesses.
- Today, Make-A-Wish has granted hundreds of thousands of life-changing wishes to children battling critical illnesses. Wishes that give families hope through dark times, strength to persevere and experiences that forever change their lives.
- When a wish comes true, it creates strength, hope and transformation in a child - and a community.

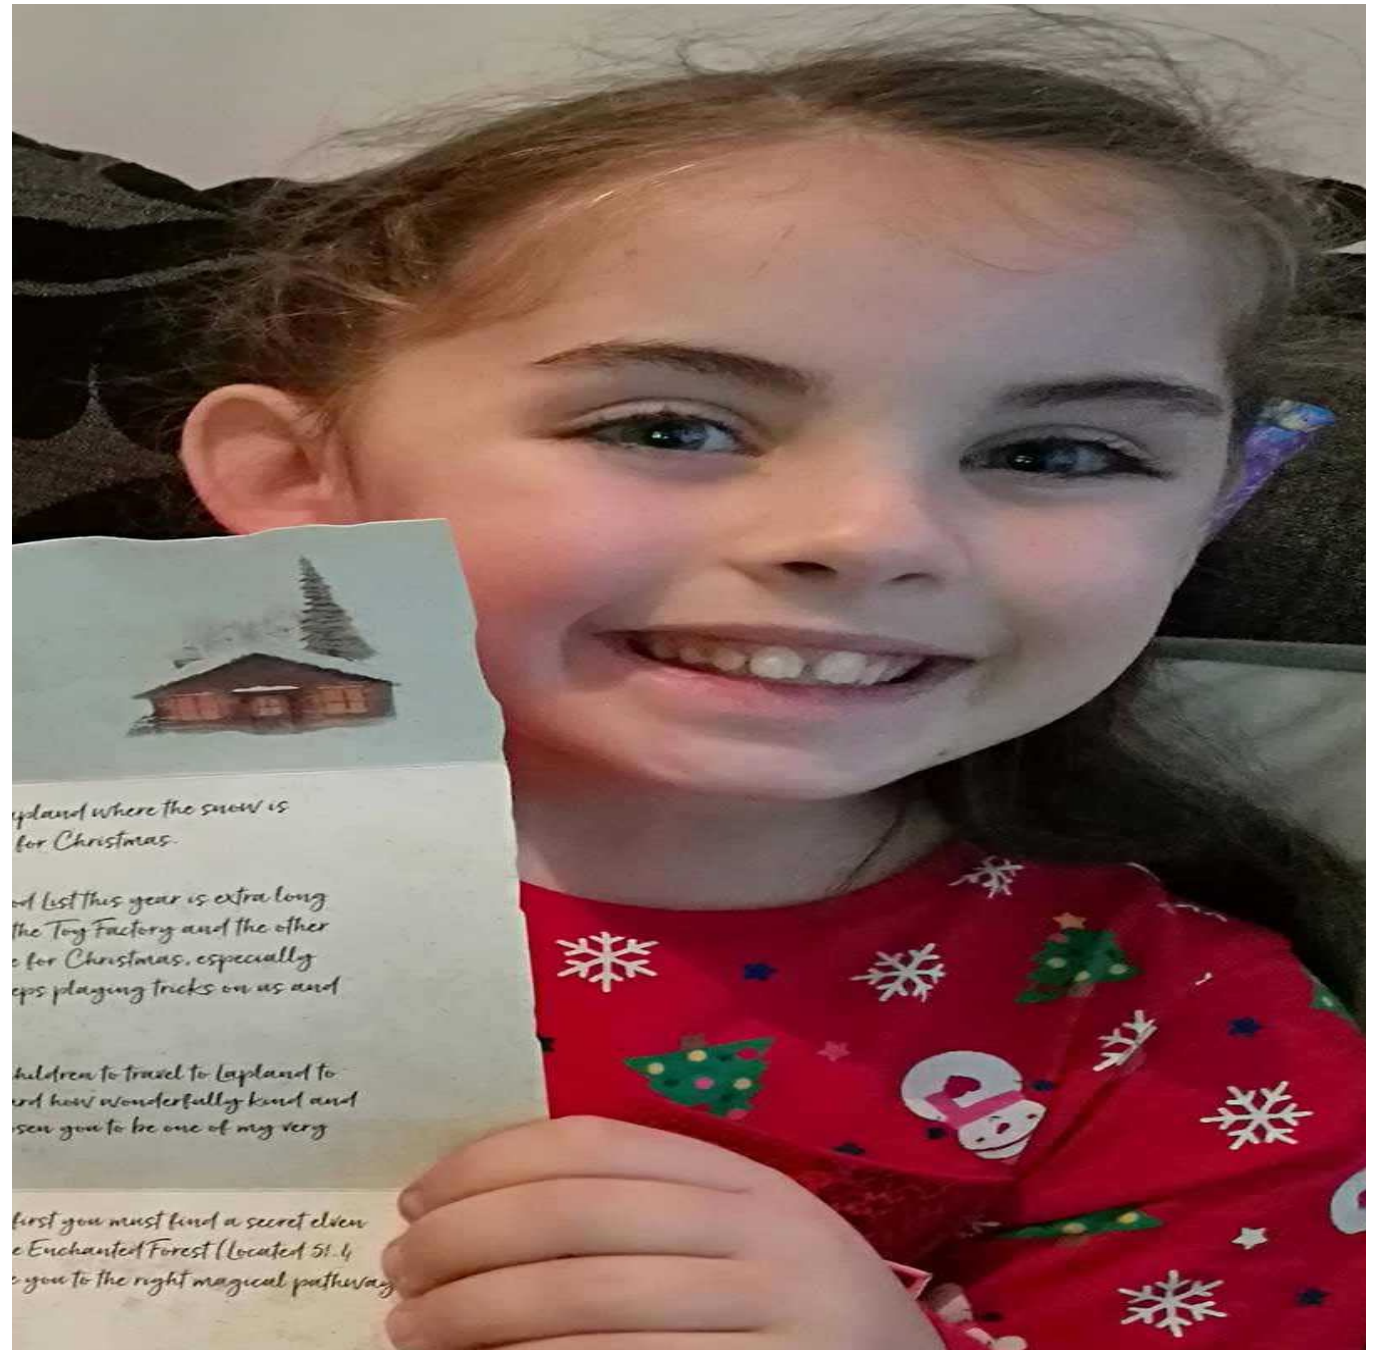

# How did make a wish start

Make-A-Wish traces its inspiration to Christopher James Greicius, an energetic 7-year-old boy battling leukemia who wishes to be a police officer. In 1980, his Phoenix community came together to make his wish come true. Little did Chris know that his wish would create a movement that would transform millions of lives.

## “I wish to meet Santa” Ella

- Seven-year-old Ella, from Bridgend in Wales, is living with Turner Syndrome, a genetic disorder that only affects girls. When she was five, doctors were concerned that Ella was not growing as she should be, and she had to have lots of tests before she was finally diagnosed. Turner Syndrome can have many associated conditions which Ella and her family are fighting to control.

# “I wish to meet Santa” Muna

- To Muna, meeting Santa Claus is a special dream. Because 11 years ago on Christmas Eve, when muna was only 2 years old she was adopted and arrived in her loving family in Italy.
- So, “Make A Wish” arranged a special trip for her to Helsinki, and she met the “real” Santa Claus in snowy-cover woods with frozen legs and rivers.
- Her father shared: “We thank Make A Wish for everything you have done fo all of us, but above all for making our daughter understand how important it is to never stop hoping, to believe in dreams!”

# How you can get involved and support...

- One of the easiest ways to get involved is simply to make a donation and help to continue granting life-changing wishes to children.
- Also you can take part in Christmas events all around the world.

The image features a light-colored wooden surface with a visible grain. Scattered across the left side and bottom are several silver, glittery snowflake-shaped decorations of various sizes. The largest snowflake is on the left, with its arms extending towards the center. Other smaller snowflakes are scattered around it, some near the top and some near the bottom. The text is positioned on the right side of the image, over the wooden background.

Thank you for watching

Merry Christmas and happy new year!
